All features at all price tiers / unlimited visitors

Your front desk is always evolving and may feel a bit chaotic at times.

If the way you're currently checking in and managing visitors, contractors, deliveries, and employees is frustrating, you need a better way.

You and your staff should be able to focus on making personal connections with your visitors and not on tasks that can be automated.

We know that it's harder to connect with your guests when you're tied to outdated routines, and that's where The Receptionist for iPad can help.
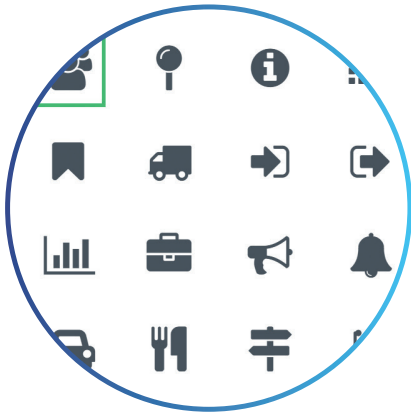

The Receptionist for iPad Story

We built The Receptionist for iPad to help ease any anxiety your staff may have when it comes to accepting, tracking, and managing both visitors and employees. Knowing who is in your office, when they arrived, and the reason for their visit empowers you to bring newfound stability to your workplace.

Our team partners with businesses and organizations of all sizes in all industries to deliver an efficient and secure visitor check-in experience. Our app is simple to set up and easy to configure to your particular location's requirements.

- More than 3,700 locations in 35 countries around the world use The Receptionist for iPad
- Every 4 seconds, someone checks into a workplace using The Receptionist for iPad
- In 2019, more than 5 million visitors checked in using The Receptionist for iPad
- The Receptionist for iPad is among the highest-rated visitor management systems on G2.com and is rated 5 out of 5 stars on Capterra and Software Advice, all based on customer reviews
- We have trademarked Radical Support® to show how committed we are to supporting and taking care of our customers

Top Benefits

Get visitors where they need to go faster

No two visitors are the same. Configure check-in buttons and work-flows to collect relevant visitor information for each visitor type. The Receptionist for iPad automatically notifies your employees via SMS, Slack, or email that a guest has arrived, and the host can respond from their smartphone or computer back to the iPad with our unique two-way communication function.
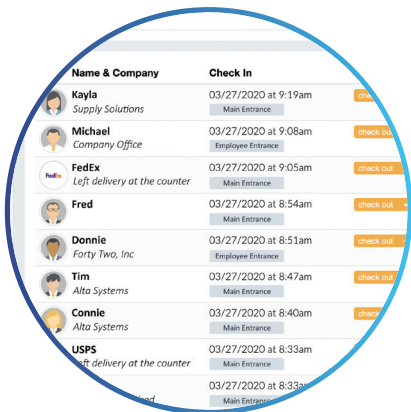

Know who is in your building, when they got there, and why

No more flipping through paper logbooks and time spent deciphering illegible signatures. Our solution stores all your visitor information securely in the cloud. Your admin can even view current or past visitor data from their phone at any time, and in the event of an emergency, access a real-time evacuation list to check off and ensure everyone in your office is safe.

You can also add an employee check-in button and keep a record of everyone — not just guests — in your building at any point in time.

Showcase an intuitive, easy check-in experience

We feature multiple ways to let your guests check in, from the familiar iPad touch interface to our safety conscious contactless check-in option. Each screen is designed to seamlessly walk your visitors through a modern, digital check-in process, so they can get to the reason for their visit faster.

Stay ahead of audits and regulations

Need to collect signed non-disclosure agreements from your guests, verify citizenship information, or perhaps have your visitors watch a safety video before entering your space? You can comply with all kinds of industry and governmental regulations with The Receptionist for iPad.
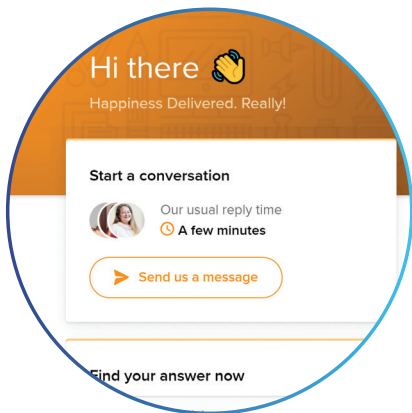

Put our Radical Support® to the test

Have questions about your new Receptionist for iPad? We've got you covered. Chat with a real live person from our in-house Radical Support® team within minutes. Thanks to our commitment to stellar customer service, our customer satisfaction is rated among the top of all software companies.

Get started in minutes with easy setup

The Receptionist for iPad is insanely easy to set up. Simply download the app to any iPad, customize your dashboard configuration, and you're ready to go! Need an iPad and a stand? Check out our Receptionist in a Box packages.

What Our Customers Are Saying

Spoiler Alert: They love us!

"It is a fantastic program that you can totally customize — well worth the cost of the iPad, the stand, and the software. … It's absolutely the right system and service for this purpose."

- **Dave Rubenstein**, Board President, 20 Sutton Place South

"The bottom line is you are probably not going to find a better value out there … we would recommend The Receptionist hands down over any other software we reviewed."

- **Curt Honcharik**, Quality Manager, Steelhead Composites

"The Receptionist is straightforward to set up and is crazy intuitive. I didn't read any instructions and figured out the setup by simply diving in."

- **Stuart Chin**, Senior Director, Customer Experience, Inbrace

"The problems caused by having a hard copy log book for guests to fill out at each visit were numerous … The benefits are happy guests and no more crowded lobby/waiting area. Oh, and our receptionist LOVES that she can focus on other more important things at hand."

- **Stephanie Stanley**, Director of Administrative Services, Michigan Health & Hospital Association

"Other than the amazing customer service? Everything! This setup has made our company's check-in process so much more efficient and looks incredibly professional."

- **Jake Lester**, Estimator, Reyco Precision
